

Dry run for Preorder traversal

1.)

Preorder : Root Left Right

LL:

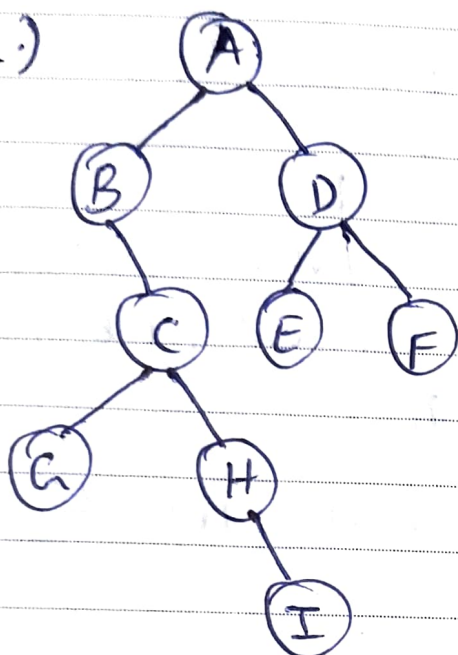

Code:

```
preorder(root)
{
    if (root == NULL)
    {
        return;
    }
    else
    {
        cout << root->data;
        preorder(root->left);
        preorder(root->right);
    }
}
```

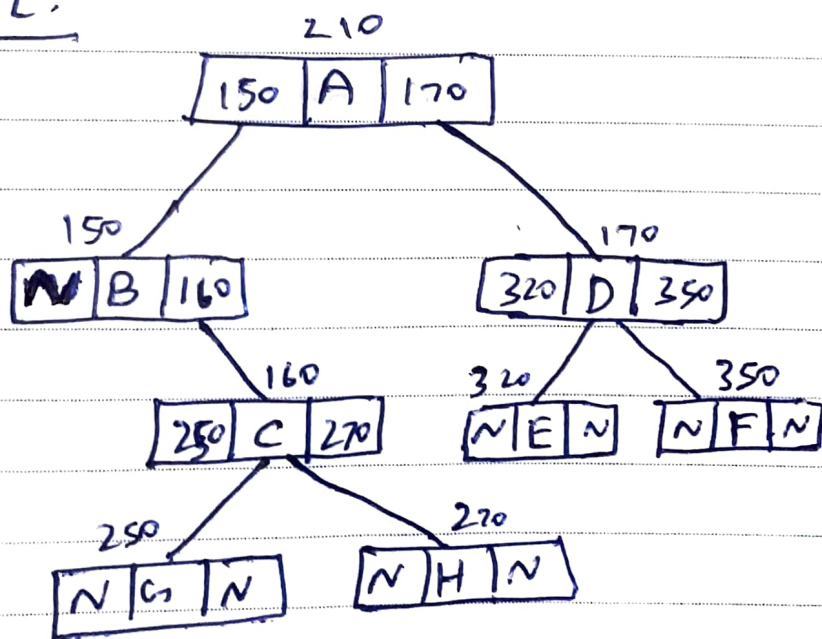

[REDACTED]
